

16 (T) Tables 12 Rounds

(T may be any even number from 14 to 24; the movement is illustrated for T equal to 16)

Type of movement: Web Mitchell.

Set out boards: Boardsets 1 to 8 (T/2) are put out on tables 1 to 8 (T/2), with boardsets 9 to 12 on a relay feeding in at table 8.

A second set of boards is put out on tables 9 to 16 (T/2+1 to T), with boardset 12 on table 16 (T), boardset 1 on table 15 (T-1), boardset 2 on table 14 (T-2), and so on down to boardset 7 on table 9 (T/2+1). Boardsets 11 to 8 are on a relay feeding in at table 16 in reverse order.

Pair Numbers: As table number.

Pair Movement: NS pairs are stationary.
EW pairs move up one table .
At the halfway stage, after 6 rounds, EW pairs perform a skip, ie they move up two tables instead of one.

Board Movement: Down one table around each of the two circuits - tables 1 to 8 (T/2), and tables 9 to 16 (T/2+1 to T).
Stationary pairs at tables 9 to 16 (T/2+1 to T) play boards in reverse order.

Comment: This movement is a variation on a standard Web Mitchell, allowing 24 boards to be played at any even number of tables between 14 and 24.
The movement of players is completely straightforward, but care needs to be taken to ensure that the correct boards are on each table.
Two duplicated sets of boards are required.
The use of wireless scoring devices or pickup-slips is recommended to avoid the need to amalgamate two travellers for each board.
For a single-winner movement, arrow-switch the final two rounds.
Movements can be constructed following the same principles for any even number of tables with an even number of rounds.

| Round | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 |
